

Permit to Construct or Modify an Air Contaminant Source Issued Pursuant to Tennessee Air Quality Act

Date Issued: May 5, 2014

Permit Number:  
968423G

Date Expires: May 4, 2015

Issued To:  
K-VA-T Food Stores, Inc.  
dba Gas N Go # 602

Installation Address:  
1175 East Morris Blvd.  
Morristown

Installation Description:  
Gasoline Dispensing Facility  
(Non-ISBMG, Stage I Vapor Recovery,  
Maximum Monthly Throughput  $\geq$  100k gal/month)

Emission Source Reference No.  
32-0318-01  
NESHAP (Subpart CCCCCC)

The holder of this permit shall comply with the conditions contained in this permit as well as all applicable provisions of the Tennessee Air Pollution Control Regulations.

**CONDITIONS:**

1. The application that was utilized in the preparation of this permit is dated February 26, 2014 and is signed by Mr. Louis A. Scudere, Vice President for the permitted facility. If this person terminates employment or is reassigned different duties and is no longer the responsible person to represent and bind the facility in environmental permitting affairs, the owner or operator of this air contaminant source shall notify the Technical Secretary of the change. Said notification shall be in writing and submitted within thirty (30) days of the change. The notification shall include the name and title of the new person assigned by the source owner or operator to represent and bind the facility in environmental permitting affairs. All representations, agreement to terms and conditions and covenants made by the former responsible person that were used in the establishment of limiting permit conditions on this permit will continue to be binding on the facility until such time that a revision to this permit is obtained that would change said representations, agreements and covenants.

(conditions continued on next page)

  
TECHNICAL SECRETARY

No Authority is Granted by this Permit to Operate, Construct, or Maintain any Installation in Violation of any Law, Statute, Code, Ordinance, Rule, or Regulation of the State of Tennessee or any of its Political Subdivisions.

NON-TRANSFERABLE

POST AT INSTALLATION ADDRESS

2. The total stated maximum throughput of gasoline for this source is 6,000,000 gallons during all intervals of twelve (12) consecutive months. The permittee shall record the monthly and 12 month throughput of gasoline in a log. The monthly throughput is defined as the total volume of gasoline that is loaded into all gasoline storage tanks during each calendar month. The log must be maintained at the source location and kept available for inspection by the Technical Secretary or his representative. Monthly data, including all required calculations, must be entered in the log no later than thirty (30) days from the end of the month for which the data is required. This record must be retained for a period of not less than two years.

Month, Year	Monthly Throughput of Gasoline (gallons/month)
January	
Etc.	
December	

Year	12 Month Throughput of Gasoline* (gallons/12 months)
January	
Etc.	
December	

\*Each gallons – per – 12 month value is the sum of the gasoline throughput in the 11 months preceding the month just completed plus the gasoline throughput for the month just completed. If data is not available for the 11 months preceding the initial use of this table, this value will be equal to the value for gallons per month. For the second month it will be the sum of the first month and the second month.

3. Pursuant to 40 CFR §63.11111, this gasoline dispensing facility (GDF), located in Hamblen County and exceeding the applicability threshold specified in 40 CFR §63.11111(d) shall be subject to all of the respective provisions of 40 CFR §63.11118 for facilities exceeding this applicability threshold and shall remain subject to these provisions even if throughput later falls below this threshold or if ownership of the facility is transferred.
4. Pursuant to 40 CFR §63.11115, the permittee shall comply with the requirements of paragraphs (a) and (b) of this condition.
- The permittee shall, at all times, operate and maintain any affected source, including associated air pollution control equipment and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions. Determination of whether such operation and maintenance procedures are being used will be based on information available to the Technical Secretary which may include, but is not limited to, monitoring results, review of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source.
  - The permittee shall keep applicable records and submit reports as specified in 40 CFR §63.11125(d) and §63.11126(b).

(conditions continued on next page)

5. Pursuant to 40 CFR §§63.11116(a) and 63.11118(a), the permittee shall not allow gasoline to be handled in a manner that would result in vapor releases to the atmosphere for extended periods of time. Measures to be taken include, but are not limited to, the following:
  - (a) Minimize gasoline spills;
  - (b) Clean up spills as expeditiously as practicable;
  - (c) Cover all open gasoline containers and all gasoline storage tank fill-pipes with a gasketed seal when not in use;
  - (d) Minimize gasoline sent to open waste collection systems that collect and transport gasoline to reclamation and recycling devices, such as oil/water separators.
  - (e) Portable gasoline containers that meet the requirements of 40 CFR part 59, subpart F, are considered acceptable for compliance with paragraph (c) of this condition.
6. The permittee shall comply with 40 CFR §§63.11117(b) and 63.11118(a) by complying with **Condition 26** of this permit.
7. Pursuant to 40 CFR §63.11118(b), except as provided in **Condition 8** of this permit, the permittee shall meet the requirements in either paragraph (1) or paragraph (2) of this condition.
  - (1) Each management practice in **Table 1, located in Attachment 1**.
  - (2) If, prior to January 10, 2008, the permittee satisfies the requirements in both paragraphs (i) and (ii) of this condition, the permittee will be deemed in compliance with this condition.
    - (i) The permittee operates a vapor balance system at the GDF that meets the requirements of either paragraph (A) or paragraph (B) of this condition.
      - (A) Achieves emissions reduction of at least 90 percent.
      - (B) Operates using management practices at least as stringent as those in **Table 1, located in Attachment 1**.
    - (ii) The permittee's gasoline dispensing facility is in compliance with an enforceable State rule or permit that contains requirements of either paragraph (A) or paragraph (B) of this condition.
8. Pursuant to 40 CFR §63.11118(c), the emission sources listed in paragraphs (1) through (3) of this condition are not required to comply with the control requirements in **Condition 7** of this permit, but must comply with the requirements in **Conditions 5 and 6** of this permit.
  - (1) Gasoline storage tanks with a capacity of less than 250 gallons that are constructed after January 10, 2008.
  - (2) Gasoline storage tanks with a capacity of less than 2,000 gallons that were constructed before January 10, 2008.
  - (3) Gasoline storage tanks equipped with floating roofs, or the equivalent.
9. Pursuant to 40 CFR §63.11118(d), cargo tanks unloading at this facility must comply with the management practices in **Table 2, located in Attachment 1** to this permit.
10. Pursuant to 40 CFR §63.11118(e), the permittee must comply with the applicable testing requirements contained in **Conditions 13 and 14**.
11. Pursuant to 40 CFR §63.11118(f), the permittee must submit the applicable notifications as required under **Condition 17**.
12. Pursuant to 40 CFR §63.11118(g), the permittee must keep records and submit reports as specified in **Conditions 18 through 23**.

(conditions continued on next page)

13. Pursuant to 40 CFR §63.11120(a), the permittee, at the time of installation of a vapor balance system required under **Condition 7**, and every 3 years thereafter, must comply with the requirements in paragraphs (1) and (2) below. For vapor balance systems installed after December 15, 2009, the permittee shall conduct an initial compliance test upon installation of the complete vapor balance system.
- (1) The permittee must demonstrate compliance with the leak rate and cracking pressure requirements, specified in item 1(g) of **Table 1, located in Attachment 1** to this permit, for pressure-vacuum vent valves installed on this source's gasoline storage tanks using the test methods identified in paragraph (i) or paragraph (ii) below.
    - (i) California Air Resources Board Vapor Recovery Test Procedure TP-201.1E,—Leak Rate and Cracking Pressure of Pressure/Vacuum Vent Valves, adopted October 8, 2003, a copy of which is included as **Attachment 2** to this permit.
    - (ii) Use alternative test methods and procedures in accordance with the alternative test method requirements in 40CFR §63.7(f).
  - (2) The permittee must demonstrate compliance with the static pressure performance requirement, specified in item 1(h) of **Table 1, located in Attachment 1** to this permit, for this source's vapor balance system by conducting a static pressure test on this source's gasoline storage tanks using the test methods identified in paragraph (i), paragraph (ii), or paragraph (iii) below.
    - (i) California Air Resources Board Vapor Recovery Test Procedure TP-201.3,—Determination of 2-Inch WC Static Pressure Performance of Vapor Recovery Systems of Dispensing Facilities, adopted April 12, 1996, and amended March 17, 1999, a copy of which is included as **Attachment 3** to this permit.
    - (ii) Use alternative test methods and procedures in accordance with the alternative test method requirements in §63.7(f).
    - (iii) Bay Area Air Quality Management District Source Test Procedure ST-30-Static Pressure Integrity Test-Underground Storage Tanks, adopted November 30, 1983, and amended December 21, 1994.
14. Pursuant to 40 CFR §63.11120(b), if the permittee chooses, under the provisions of 40 CFR §63.6(g), to use a vapor balance system other than that described in **Table 1, located in Attachment 1** to this permit, the permittee must demonstrate to the Technical Secretary, the equivalency of their vapor balance system to that described in **Table 1, located in Attachment 1** to this permit using the procedures specified in paragraphs (1) through (3) below.
- (1) The permittee must demonstrate initial compliance by conducting an initial performance test on the vapor balance system to demonstrate that the vapor balance system achieves 95 percent reduction using the California Air Resources Board Vapor Recovery Test Procedure TP-201.1,—Volumetric Efficiency for Phase I Vapor Recovery Systems, adopted April 12, 1996, and amended February 1, 2001, and October 8, 2003, a copy of which is included as **Attachment 4** to this permit.
  - (2) The permittee must, during the initial performance test required under paragraph (1) of this condition, determine and document alternative acceptable values for the leak rate and cracking pressure requirements specified in item 1(g) of **Table 1, located in Attachment 1** to this permit, and for the static pressure performance requirement in item 1(h) of **Table 1** to this permit.
  - (3) The permittee must comply with the testing requirements specified in **Condition 13** of this permit.

(conditions continued on next page)

15. Pursuant to 40 CFR §63.11120(c), performance tests conducted for 40 CFR 63, subpart CCCCCC shall be conducted under such conditions as the Technical Secretary specifies to the permittee based on representative performance (i.e., performance based on normal operating conditions) of the affected source. Upon request, the permittee shall make available to the Technical Secretary such records as may be necessary to determine the conditions of performance tests.
16. Pursuant to 40 CFR §63.11120(d), gasoline cargo tanks, owned or operated by the permittee, subject to the provisions of **Table 2, located in Attachment 1**, must conduct annual certification testing according to the vapor tightness testing requirements in 40 CFR §63.11092(f).
17. Pursuant to 40 CFR §63.11124(b), the permittee must comply with paragraphs (1) through (5) of this condition, except that instead of notifying the Administrator, notices shall be provided to the Technical Secretary.
  - (1) The permittee must submit a Notification of Performance Test, as specified in 40 CFR §63.9(e), prior to initiating testing required by §63.11120(a) and (b).
  - (2) The permittee must submit additional notifications specified in 40 CFR §63.9, as applicable.
18. Pursuant to 40 CFR §63.11125(a), the permittee must keep records of all tests performed under **Conditions 13 and 14**.
19. Pursuant to 40 CFR §63.11125(b), the permittee shall keep records required under **Condition 18** of this permit for a period of 5 years and shall make these records available for inspection by the Technical Secretary or his representative(s) during the course of a site visit.
20. Pursuant to 40 CFR §63.11125(c), each gasoline cargo tank subject to the management practices in **Table 2, located in Attachment 1** must keep records documenting vapor tightness testing for a period of 5 years. Documentation must include each of the items specified in 40 CFR §63.11094(b)(2)(i) through (viii). Records of vapor tightness testing must be retained as specified in either paragraph (1) or paragraph (2) of this condition.
  - (1) The owner or operator must keep all vapor tightness testing records with the cargo tank.
  - (2) As an alternative to keeping all records with the cargo tank, the permittee may comply with the requirements of paragraphs (2)(i) and (ii) of this condition.
    - (i) The permittee may keep records of only the most recent vapor tightness test with the cargo tank, and keep records for the previous 4 years at their office or another central location.
    - (ii) Vapor tightness testing records that are kept at a location other than with the cargo tank must be instantly available (e.g., via e-mail or facsimile) to the Technical Secretary's delegated representative during the course of a site visit or within a mutually agreeable time frame. Such records must be an exact duplicate image of the original paper copy record with certifying signatures.

(conditions continued on next page)

21. Pursuant to 40 CFR §63.11125(d), the permittee shall keep records as specified in paragraphs (1) and (2) of this condition.
  - (1) Records of the occurrence and duration of each malfunction of operation (i.e., process equipment) or the air pollution control and monitoring equipment.
  - (2) Records of actions taken during periods of malfunction to minimize emissions in accordance with 40 CFR §63.11115(a), including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation.
22. Pursuant to 40 CFR §63.11126(a), the permittee shall report to the Technical Secretary the results of all volumetric efficiency tests required under **Condition 15**. Reports submitted under this condition must be submitted within 180 days of the completion of the performance testing.
23. Pursuant to 40 CFR §63.11126(b), the permittee shall report to the Technical Secretary, by March 15 of each year, the number, duration, and a brief description of each type of malfunction which occurred during the previous calendar year and which caused or may have caused any applicable emission limitation to be exceeded. The report must also include a description of actions taken by the permittee during a malfunction of an affected source to minimize emissions in accordance with 40 CFR §63.11115(a), including actions taken to correct a malfunction. No report is necessary for a calendar year in which no malfunctions occurred.
24. Pursuant to 40 CFR §63.11130, **Table 3, located in Attachment 1** to this permit, shows which parts of the General Provisions (40 CFR part 63, subpart A) apply to the permittee.
25. Pursuant to TAPCR 1200-03-18-.24(1)(a)1 and 1200-03-18-.24(1)(a)2, this facility, located in Hamblen County and exceeding the applicability threshold specified in Part 1200-03-18-.24(1)(b)2 and Subpart 1200-03-18-.24(1)(b)3(ii) shall be subject to all of the respective provisions of TAPCR 1200-03-18-.24 for facilities exceeding this applicability threshold and shall remain subject to these provisions even if throughput later falls below this threshold or if ownership of the facility is transferred.
26. Pursuant to TAPCR 1200-03-18-.24(3)(a)1, all gasoline storage vessels at this facility shall be loaded by submerged fill. The term "submerged fill" is defined in paragraph 1200-03-18-.01(76) as the method of filling a delivery vessel or storage vessel where product enters within 5.9 inches of the bottom of the delivery or storage vessel. Bottom filling of delivery and storage vessels is included in this definition.
27. Pursuant to TAPCR 1200-03-18-.24(3)(a)2, all vapor lines on the gasoline storage vessels shall be equipped with closures that automatically seal upon disconnect.
28. Pursuant to TAPCR 1200-03-18-.24(3)(a)3, all gasoline storage vessels at this facility shall be served by a Stage I vapor recovery system, approved by the Technical Secretary, and designed, installed, and maintained to recover gasoline vapors displaced during transfer of gasoline from a tank truck to a storage tank.
29. Pursuant to TAPCR 1200-03-18-.24(3)(a)4, if a gasoline storage vessel gauging well separate from the fill tube is used for manual measurement, it shall be provided with a submerged drop tube that extends to within 5.9 inches of the gasoline storage vessel bottom.

(conditions continued on next page)

30. Pursuant to TAPCR 1200-03-18-.24(3)(a)5, liquid fill connections for all systems shall be equipped with vapor-tight caps.
31. Pursuant to TAPCR 1200-03-18-.24(5)(b)3, required permits shall be kept at the facility for which the permits are issued.
32. Pursuant to TAPCR 1200-03-18-.24(5)(c)1, the permittee shall report each occurrence of excess emissions as required in **Attachment 6** to the Technical Secretary within 30 calendar days of becoming aware of such occurrence. Excess emissions shall mean any emissions caused by a deficiency in meeting the standards described in Rule 1200-03-18-.24(3).
33. This source shall comply with all applicable state and federal air pollution regulations. This includes, but is not limited to, federal regulations published under 40 CFR 63 for sources of hazardous air pollutants and 40 CFR 60, New Source Performance Standards.
34. This source shall operate in accordance with the terms of this permit and the information submitted in the approved permit application. TAPCR 1200-03-09.
35. This permit is valid only at this location. TAPCR 1200-03-09-.03(6).
36. This permit shall serve as a temporary operating permit from initial start-up to the receipt of a standard operating permit (regardless of the expiration date), provided the operating permit is applied for within thirty (30) days of initial start-up and the conditions of this permit and any applicable emission standards are met. TAPCR 1200-03-09.

(conditions continued on next page)

37. The permittee shall certify the start-up date of the air contaminant source regulated by this permit by submitting

***A COPY OF ALL PAGES OF THIS PERMIT,***

with the information required in A) and B) of this condition completed, to the Technical Secretary's representatives listed below:

A. DATE OF START-UP: \_\_\_\_/\_\_\_\_/\_\_\_\_  
month day year

B. Anticipated operating rate: \_\_\_\_ percent of maximum rated capacity.

For the purpose of complying with this condition, "start-up" of the air contaminant source shall be the date of the setting in operation of the source for the sale of gasoline.

The undersigned represents that he/she has the full authority to represent and bind the permittee in environmental permitting affairs. The undersigned further represents that the above provided information is true to the best of his/her knowledge and belief.

Signature		Date
Signer's name (type or print)	Title	Phone (with area code)

Note: This certification is not an application for an operating permit. At a minimum, the appropriate application form, an APC 150 (or an APC 20, if no changes have been made to the facility as described in the APC 150 submitted to apply for this permit), must be submitted requesting an operating permit. The application must be submitted in accordance with the requirements of this permit.

The completed certification shall be delivered to East Tennessee Permit Program and the Environmental Field Office at the addresses listed below no later than 30 days after the air contaminant source is started-up.

East Tennessee Permit Program  
Division of Air Pollution Control  
9th Floor, L & C Annex  
401 Church Street  
Nashville, TN 37243-1531

Knoxville Environmental Field Office

**Location:** K-VA-T Food Stores, Inc,dba Gas N Go # 602  
1175 East Morris Blvd.,  
Morristown

**Permit Number:** 968423G

1. The owner or operator of this facility has demonstrated to the Technical Secretary a compliance certification by inspection. Certification included the following:
  - (a) For initial compliance certification, as a minimum:
    1. Name and location of the facility.
    2. Address and telephone number of the person responsible for the facility.
    3. Identification of facility as gasoline dispensing facility.
  - (b) For the facility, as a minimum:
    1. The applicable equipment specification, or work practice;
    2. The method of achieving compliance;
    3. The control system(s) in use;
    4. Certification that the tanks, plumbing, and regulated equipment at the facility are in compliance with the applicable equipment specifications, or work practices.
    5. List any tank that fulfills the "exemption" criteria of 1200-03-18-.24(1)(b)1.
2. The owner or operator of this facility shall, for each occurrence of excess emissions, within 30 calendar days of becoming aware of such occurrence, supply the Technical Secretary with the following information:
  - (a) The name and location of the facility;
  - (b) The subject tanks, plumbing, or equipment that caused the excess emissions;
  - (c) The time and date of first observation of the excess emissions;
  - (d) The cause and expected duration of the excess emissions;
  - (e) The proposed corrective actions and schedule to correct the conditions causing the excess emissions.

Re: Construction Permit, Gas N Go # 602, 1175 East Morris Blvd., Morristown, Tennessee, 32-0318-01, 968423

Dear Mr. Scudere:

Please find enclosed Construction Permit # 968423G for the gasoline dispensing facility located at 1175 East Morris Blvd., Morristown, Tennessee. It is important that you read and understand the permit.

If you have any questions concerning this correspondence, please contact Mrs. Sarosh Kaiser at (615) 532-0585.

Sincerely,

for John A. Trimmer, Chief  
East Tennessee Permit Program
